Professional Summary

Backend Software Engineer with **3+ years of hands-on experience** architecting, testing, and deploying secure web backends and RESTful APIs using **Python, Django, and Django REST Framework (DRF)**. Proven expertise in relational database design (**PostgreSQL**), asynchronous task queues and caching (**Celery & Redis**), and full-lifecycle containerization and server deployment with **Docker, Nginx, and Ubuntu Linux**. Successfully engineered and deployed **4 live, multilingual production web applications** (including international client platforms operating across Germany, Egypt, and Vietnam), leveraging **Cursor and Antigravity AI agents** to deliver security-hardened **Next.js & React.js** frontends.

Technical Skills

Backend & APIs	**Python**, **Django**, **Django REST Framework (DRF)**, RESTful API Design, JWT Authentication, Custom Permissions, Multilingual Architecture (i18n), **Swagger (OpenAPI)**, **Postman**
Database & Async Queues	**PostgreSQL**, Relational Schema Design, ORM Query Optimization (`select_related` / `prefetch_related`), **Redis** (Caching & Message Broker), **Celery & Celery Beat** (Background & Scheduled Tasks)
DevOps & Linux Server	**Ubuntu Linux Administration**, **Docker & Docker Compose**, **Nginx** (Reverse Proxy, SSL/TLS, Static/Media Serving), Gunicorn, Cloudflare CDN, **Git & GitHub**
AI-Augmented Full-Stack	**Cursor AI**, **Antigravity Agent**, AI-Assisted **Next.js & React.js** Delivery (SSR, Dynamic RTL/LTR Layouts, Secure API Integration, CORS/CSRF & XSS Hardening)

Professional Experience

Backend Software Engineer (Python / Django) | Freelance & Production Systems 2023 – Present (3+ Years)

- Backend & API Architecture: Architected and developed scalable **backend** systems and **RESTful APIs** using **Python**, **Django**, and **DRF**, implementing custom business logic, strict data validation, and secure **JWT authentication**.

- Database & Async Workflows: Designed normalized **PostgreSQL** databases and integrated **Redis** and **Celery** to handle high-speed caching, asynchronous background processing, and automated deadline reminders.

- Custom Client Solutions: Engineered bespoke registration workflows and multi-region platforms tailored to strict client specifications for international operations in Germany, Egypt, and Vietnam. - API Documentation & Testing: Created interactive **Swagger** (**OpenAPI**) documentation for seamless frontend-backend integration and **validated API endpoints**, payloads, and edge cases using **Postman**.

- Linux & Docker Deployment: Containerized full-stack environments (Django, Next.js, PostgreSQL, Redis, Celery, Nginx) using **Docker Compose**, deploying and maintaining 4 live production systems on **Ubuntu servers**.

- AI-Accelerated Frontend Integration: Directed Cursor and Antigravity **AI agents** to build responsive, security-hardened Next.js and React.js user interfaces with complex multilingual (EN/DE/AR/FA/NL) and RTL/LTR support.

Live Production Projects (4 Active Systems)

- Emigrate4Work — International Immigration & German Exam Platform — https://emigrate4work.com

Stack: Django, DRF, PostgreSQL, Redis, Celery, Next.js, React.js, Docker, Nginx, Ubuntu Architected the backend API, database schema, and containerized Ubuntu deployment for an international immigration and German language exam organization operating in Germany, Vietnam, and Egypt (4-language architecture: EN, DE, FA, AR; actively serving EN & DE).

- ÖSD Exam Registration Portal (Egypt Branch) — https://exams-eg-emigrate4work.com

Stack: Django, DRF, PostgreSQL, Redis, Celery, Next.js, React.js, Docker, Nginx, Ubuntu Engineered a standalone, custom-tailored exam registration platform affiliated with Emigrate4Work for official ÖSD German exams. Built bespoke registration validation rules per client requirements, actively running in 3 languages (German, English, Arabic).

- Advanced Planner — Smart Workspace & Productivity SaaS — https://advanced-planner.mahdymollayousefy.com

Stack: Django, DRF, PostgreSQL, Redis, Celery, Next.js, React.js, Docker, Nginx, Ubuntu Developed a 3-language (EN, FA, DE) productivity application featuring a smart dashboard, daily planner, and multi-workspace team collaboration, utilizing Celery and Redis for automated task reminders and deadline notifications.

- Multilingual Developer Portfolio & Client Portal — https://mahdymollayousefy.com

Stack: Django, DRF, PostgreSQL, Redis, Celery, Next.js, React.js, Docker, Nginx, Ubuntu Built and deployed a containerized 4-language (EN, FA, DE, NL) full-stack portfolio and project inquiry system featuring dynamic model translation, automated health monitoring, and Nginx reverse-proxy routing.

Education & Languages

- B.Sc. in Computer Engineering — Islamic Azad University, Karaj Branch (**Graduated**)

- Languages: **English** (Fluent — **C1**) | **Persian / Farsi** (Native)
